EXORDIUM

In the developing world it is fortunate to participate in new digital financial systems also known as cryptocurrency, but it does not take long to realize the simultaneous risks. Scams are online everywhere, and cryptocurrency trading is not the same. Due to the robustness, anonymity, expansion and unchanging nature of crypto, the company and the computer crime department were unable to catch the fraudsters. Deep down in the story came a clear picture of countless scams and related crimes, which even killed. Cryptocurrency fraud is now a dominant topic, which is being discussed and ignored by law enforcement agencies as the source of the abuse has grown uncontrollably.

Introduction

A few months back, we were scammed by some scammers because we became greedy and lost almost \$3 million.

We filed a police case to the cybercrime department and took their help to catch scammers but unfortunately, we could not do anything because of the decentralized, irreversible & anonymous nature of crypto.

We contacted some international agencies of the world also, but again nothing was found.

We were scammed,
Now we won't let others be scammed

From that day, we accepted that it is very difficult to catch the scammers if they are really smart.

Day by day the frauds and scammers are increasing because they find this very easy and lucrative. They are not caught even.

Crime Rates & Criminals are increasing. People from the crypto industry are scammed with big amounts. What they believe that it is very easy to scam and run away without any clue.

We made research on scams and scammers in the crypto industry, We made some surveys also about scams and Ponzi schemes too. We found some shocking results. We found that many innocent poor, middle-class people lost too much amount that they committed suicide also.

These are not the suicides but rather they are the murders by the scammers. This is the murder of humanity. This must be stopped. We must do something to stop this.

So, we thought to protect others who can be the scammers' next target. And started thinking about a unique initiative that can protect people who involve in the crypto industry and can easily be scammed. We are not sure what will we achieve or how many people can we save but we are very much sure that at least this initiative will provide a platform to protect innocent people.

If we succeed to save even a single person's life, we will consider this initiative to be successful. Because If we save one person that means we are saving humanity. And that would be the biggest reward for us.

Our Slogan says everything: **"We were scammed, Now we won't let others be scammed"**

See the broad picture About Us

We are the ones who were scammed and we think that is enough to start this initiative

2023

We want to keep our identity anonymous because we don't want to take credit for such a noble cause. We believe in Karmas and this good cause (Karmas) will help us to help people by protecting them against scammers & Frauds.

Even though someone wants to know about us then he/she can try to track our activities, we won't mind this. But we will just request them to keep our identity secret limited to them only.

We are here to protect people and we will put our 100% effort with mind & heart.

Mission

To rid the world of scams through coordinated international collaboration.

Vision

To lead the fight against scams worldwide

Why we choose a decentralized **blockchain system?**

FULL DATA HISTORY

When you look at a regular database, you're getting a snapshot of data that's up to date at that moment in time. Blockchains do this too, but they also maintain a record of all the information that existed before. It's a database with history if you like.

NO CENTRAL POINT OF ATTACK FOR HACKERS

The fact that blockchain is a decentralized way of storing and accessing data makes the whole system incredibly secure – because, unlike a centralized database, there's no one single point of entry for hackers. This makes it particularly useful for recording transactions in a secure manner.

NO CENTRAL AUTHORITY

Because the system of record is decentralized and replicated in its entirety in multiple places, there's no need for a central administrator and all the costs and infrastructure that comes with it.

AROUND THE WORLD CRYPTO SCAMS

Today, the rapidly changing nature of the cryptocurrency market and the kind of impact we will have on the future of trading evokes many similar emotions. As the attention of retailers, speculators, and various types of institutional investors continues to turn to profitable cryptocurrency markets, so does the attention of fraudsters and scammers.

Crypto scams usually aim to obtain confidential information such as security codes, Private Keys, Recovery Phrases/words, JSON files, etc or trick an unsuspecting person into sending a cryptocurrency to a corrupted digital wallet.

SOME OF THE HAZARDOUS LIST OF SCAMS IS GIVEN BELOW

OneCoin
\$4 billion

OneCoin is a classic example of a Ponzi scheme in the crypto world. Between 2014 and 2016, OneCoin.

Another huge pyramid scheme, BitConnect went from hero to zero at top speed. Founded in 2016.

BitConnect
\$2 billion

Pincoin & iFan
\$870 million

The Pincoin and iFan scam was one of the biggest ICO frauds in crypto history.

ACChain is the archetypal ICO scam, having defrauded initial investors out of \$80 million.

ACChain
\$80 million

OneCoin
\$4 billion

A crypto investor lost \$120,000 from clicking on one bad link. His horror story is becoming increasingly common.

Australian watchdog sues Facebook-owner Meta over fake crypto ads.

An article published by CNBC said “scammers took home a record of \$14 billion in cryptocurrency in 2021, crypto related crimes rose 79% from a year earlier.

Coincheck hack” is termed as the biggest scam costing 58 billion Japanese yen.

Another firm “Centra Tech” was involved in a large fraud scheme which swooped an amount estimating.

TYPES OF SCAMS AND PRECAUTIONS TO BE TAKEN

Cryptocurrencies are naturally speculative. They do not have the traditional foundations that investors can analyze and value. As a result, cryptos tend to be variable assets - their prices can fluctuate significantly on any given day. Crypto markets are also not regulated in general, so it is easy for bad players to aggressively influence prices and exploit unsuspecting investors. For these reasons, investors should be aware of the following crypto scams before starting to invest in crypto.

1.MARKET MANIPULATION

Market fraud is a deliberate attempt to influence or disrupt crypto currencies' prices. Frequently, fraudsters deceive the markets in order to provide a favorable measure for themselves and to make quick returns.

Pre Caution: - Always learn about growth structures and market patterns in which you will invest. Keep an eye out for prices in the real portfolio and report if you see any volatility that should not be part of the market.

2.PUMP AND DUMP SCHEMES

The pumping and dumping system represents an individual or group effort to raise crypto currency prices so that they can sell their goods for profit.

Pre Caution: - So, there are lot of pump and dump groups who send signals for pumping of certain crypto currencies. Then they start pumping the price of crypto and take their benefits but the one who is new to signals makes a loss because he/she enters market at high. So, beware of such signals. And not to participate such activities.

3.RUG PULLS

Rugby draws occur when crypto developers leave the project but keep the money collected from investors. Evil actors can list new token on domain exchanges, associate it with official cryptocurrency, and raise interest rates on social media to attract investors. When enough money goes into their token, the developers scrutinize the project and work with investor funds.

Pre Caution: - The easiest way to identify a token that can be deducted is to check its total spending pools. Real tokens with strong project objectives will have tens of millions of dollars in revenue. It is very likely that a cryptocurrency with a limited liquidity pool will be drawn. Make your own calculation before investing.

5.INITIAL COIN OFFERING (ICO) SCAMS

The Initial Coin Offerings (ICO) is equivalent to the Initial Public Offering (IPO) of stock. An easy way to detect an ICO scam - or an unorganized management team - is to review the company's white paper. This document provides details on the background of the project, including strategy, objectives, and market analysis. If the company does not provide white paper, that is the red flag. ETC.

Pre Caution: - A cryptocurrency or ICO whitepaper is the basic document for that project. Companies that do not provide white paper should be avoided at all costs.

4.TRADITIONAL HACKING AND THEFT

Just as you would not share your credit card number with a stranger, keep your keys confidential somewhere safe. Scammers can use this information to hack accounts and extort money - and they will use various tactics to get investors to disclose their confidential information. Beware of phishing emails to steal sensitive information that could act as a crypto exchange or a wallet provider. The same goes for external blue promotions and unsolicited promotions from suspicious websites and fraudulent accounts. Fraudsters often impersonate celebrities or executives of large corporations, promising guaranteed and immediate profits if you do something immediately.

Pre Caution: - Never access personal or financial data via public WIFI, question about links and attachments, choose your apps wisely, turn off unwanted items.

6.TELEGRAM CHATS

Many time when you ask for support from a particular exchange team or real crypto project teams, you will start to get answers from fraudsters. You will receive random messages in the telegram about solving your issues.

Warning: - One should stop responding to continuous and indifferent text messages on telegram or any other social media platforms.

7. INVESTMENT SCAMS

These scammers ask you to invest money to earn higher returns without financial risk, then request you to bring more people in to do the same. They often need a constant flow of new people investing in order to make money. Ponzi and pyramid schemes are great examples of investment scams.

Pre Caution: - Always verify the license of the person selling the investment, verify if the investment is registered, beware of promises of high rates of return and or quick profits, be suspicious of the high-pressure sales and unsolicited offers, always ask for prospectus, consult a third-party person.

9. GIVEAWAY SCAMS

Scammers are using social media to perpetuate giveaway scams. They post screenshots of forged messages from companies and executives promoting a giveaway with hyperlinks to fraudulent websites. Fake accounts will then respond to these posts affirming the scam as legitimate. The fraudulent websites will then ask that you “verify” your address by sending cryptocurrency to the scam giveaway.

Warning: Be skeptical of websites or services promising high returns or unrealistic investment opportunities. If it sounds too good to be true, it usually is. **Precaution:** - send cryptocurrency to trusted third parties. Search for publicly verifiable reviews or articles involving the recipient. Watch for grammatical errors in communications or on websites. Scammers often make grammar or spelling mistakes. Research the organization thoroughly. Check consumer-protection websites and make telephone calls and send emails to verify authenticity.

8. LOADER OR LOAD-UP SCAMS

Fraudsters frequently offer “loading” services on a variety of platforms. They claim to need Specific Wallet accounts with high limits, offering the victim a portion of the proceeds. These scammers use stolen credit cards on compromised accounts to perpetuate payment fraud. The end result is the victim is left with payment delinquencies after the legitimate card holder discovers the fraud, the scammer often steals any available cryptocurrencies and submits unauthorized charges on verified payment methods. Be aware, you are responsible for any payments submitted using your authentication credentials.

Pre Caution: - Be aware, you are responsible for any payments submitted using your authentication credentials. Never provide your passwords or security codes to third parties under any circumstances.

10. EMAIL IMPERSONATION: SPOOFED WEBSITES AND PHISHING ATTEMPTS

This scam is the most common in the cryptocurrency world. Through phishing emails, scammers might impersonate representatives from popular cryptocurrency exchanges like Binance, Huobi Global, or Coinbase.

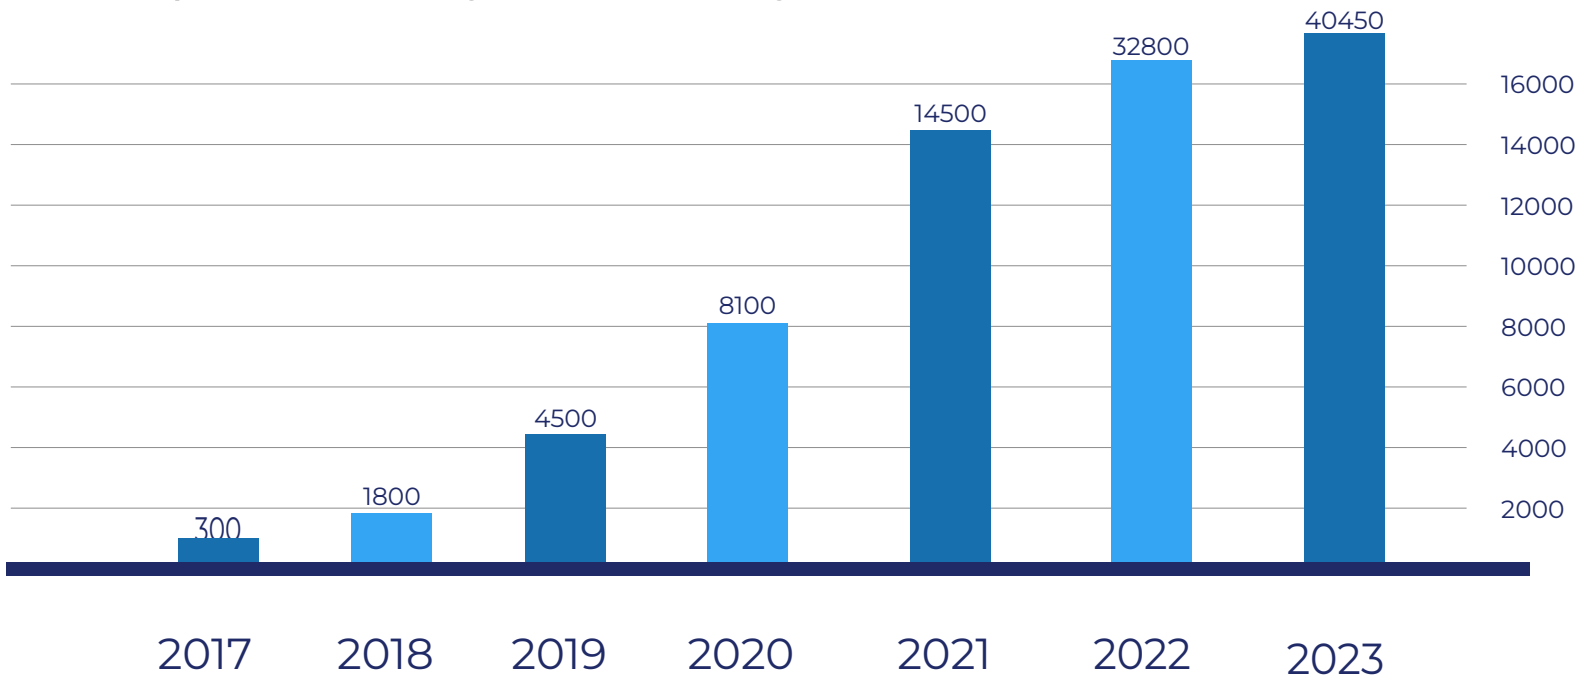

They could also impersonate Bitcoin wallets or other cryptocurrency apps. Oftentimes, they’ll issue a “security alert” in an attempt to alarm you and lure you to a fraudulent site to enter your security and account credentials. This allows them to gain access to your Bitcoin or cryptocurrency account.

Pre Caution: To protect yourself, it’s a good idea to manually type in the name of the website into your browser to ensure you get to the right one. A little extra time spent to ensure your protection is worth it.

STATISTICS OF SCAMS & RECOVERY RATE

The below given graph shows the statistics of Scams from 2017 to 2022. We can see that every year there is significant increment in crypto space. People made a huge losses through out and lost in billions of dollars.

RECOVERY RATE:

The fact that the recovery rate is not even half of the crime rates should be alarming. Investors tend to fall for scams more than once but they strive nothing to take a step forward for the loss of their money to the scam. Our website will make no sense if clients just decide to be okay with the whole scamming scenario, the recovery rate which is already very low at 4% might touch the ground and even more assets or money could be lost. One of the most important steps to prevent getting scammed.

The survey shows that only less than 4% of the fund could have been recovered.

NEED OF STRONG & AUTHENTIC PLATFORM.

With all this scamming news surfacing around the crypto world point towards the strong need of a platform which educates, reports, compensates, and stands with the victim all at once. A platform which abstains the scammers from the conduction of fraud activities and leading the fight against scammers and fraudsters online, with the help and contribution of a decentralized system through coordinated international collaborations, make the crypto world safe for investments.

INTRODUCING TESLA INU TOKEN (TSIT)

Here, we present the first ever scam mining project in the crypto market designed to prevent scams in any industry using the Decentralized Blockchain ecosystem. The Tesla Inu Mission, is ready with fully armed weapons (Proof of Fraud) to prevent all fraud and corruption deceivers.

What is Tesla Inu Token?

The Tesla Inu Token (TSIT) is a BEP20 token built into the BNB Blockchain based on a special environmental system, which invites all crypto world stakeholders to work on the same goal of tackling blockchain fraud and online fraud.

How the Scam Mining (Proof of Scam Protocols) works?

- 1 User Reports Scam
- 2 Reported Scam will go to Scam Miners
- 3 Scam Miners will verify the Scam
- 4 Minimum Verification: No Limit,
Maximum Verification: 500
- 5 Verification Time Limit: 24 Hours
- 6 The Scam is confirmed
- 7 User who reported gets TSIT as Reporting Fees
+ All Scam Miners (Max 100) who verified the scams will receive Equal TSIT as Verification Fees + The Scam Miner who verifies Maximum no of scams in 24 hours, will receive TSIT as Scam Mining Reward [This transactions of TSIT is called the proof of scam (PoS)]
- 8 Confirmed Scams will be posted on www.scamscan.org for public use

COMPARISON OF PROOF OF WORK & PROOF OF SCAM

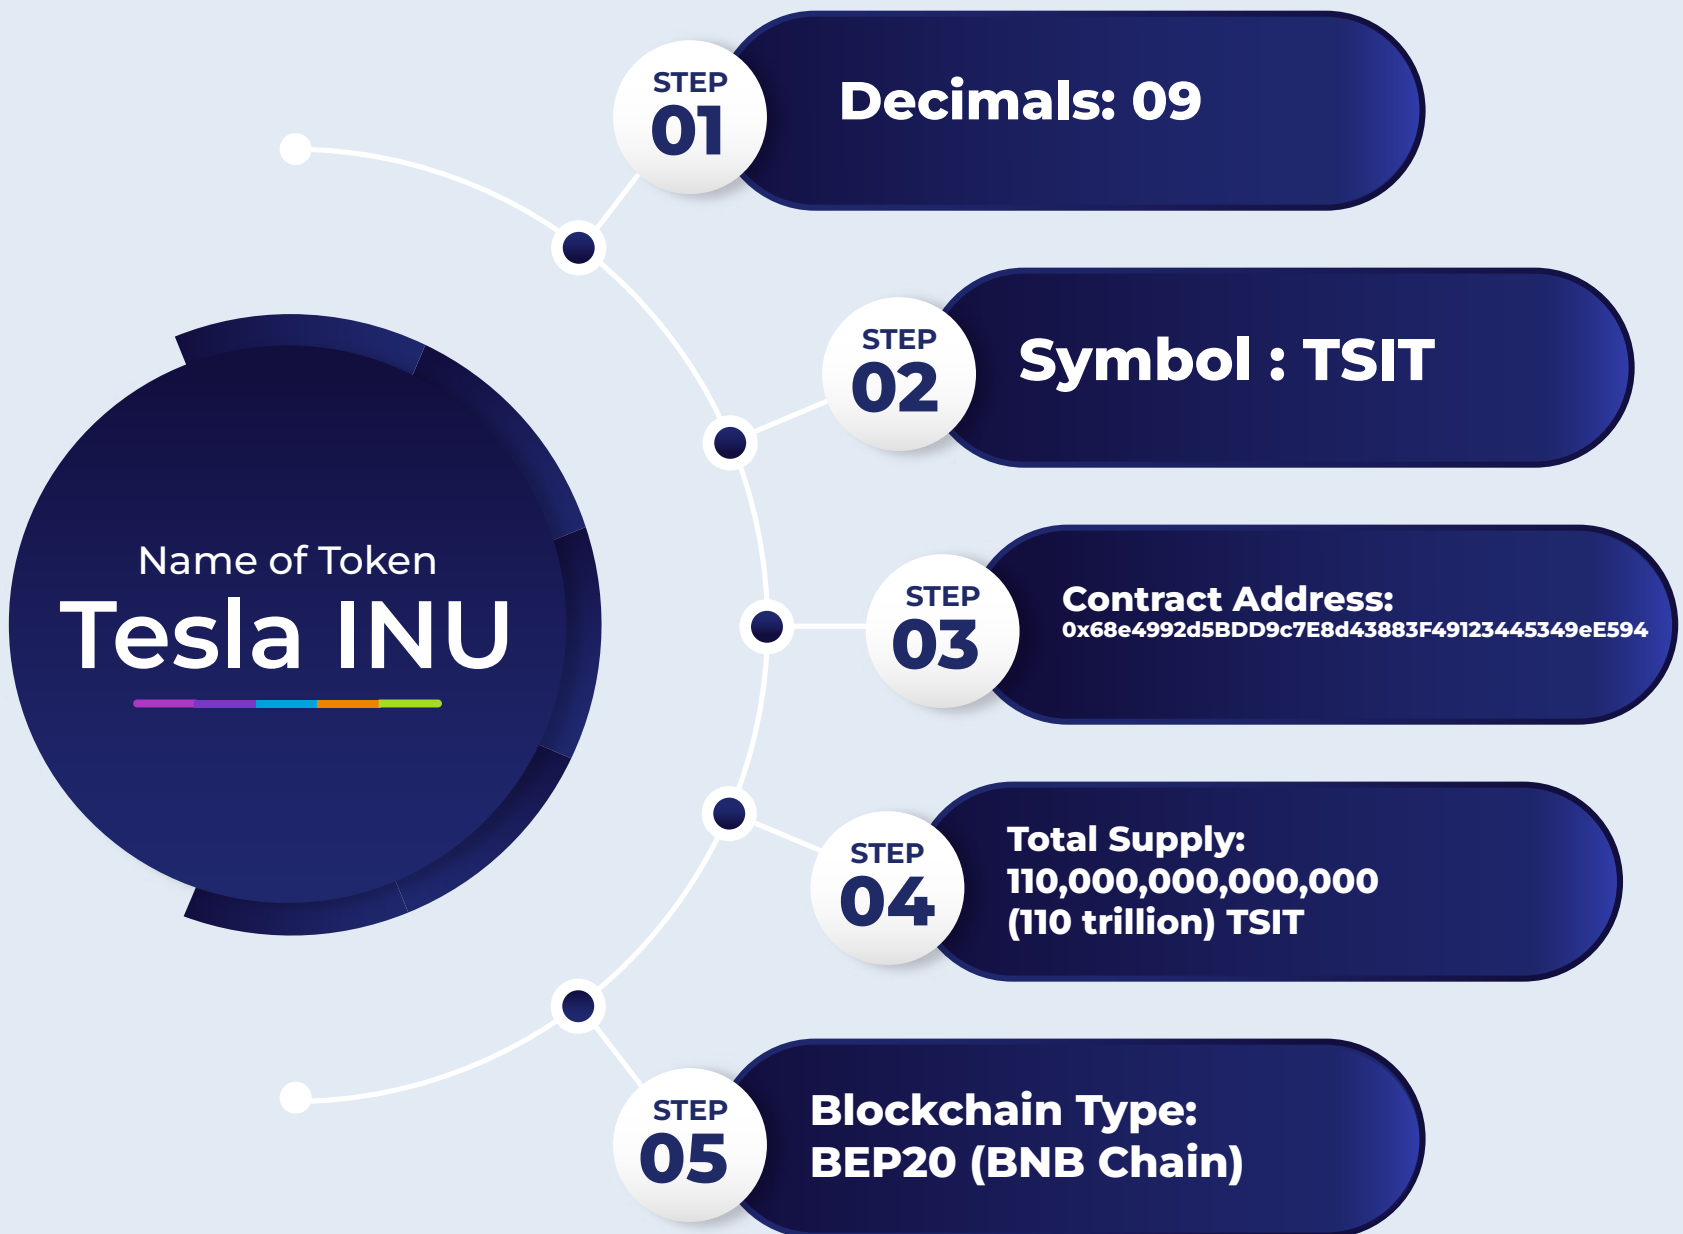

Particulars	BTC (Bitcoin)	TSIT (Tesla Inu Token)
Blockchain	Bitcoin Blockchain	BNB Chain
Tech Protocol	Proof of Work (PoW)	Proof of Scam (POS)
Mining Equipment	Yes	No
Energy Consumption	Yes	No
Miner's Income	Network Fees	Scam Verification Fees
Miner's Reward	Mining Reward	Scam Mining Reward
Sender Benefit	No	Scam Report Fees

BENEFITS OF TESLA INU

- Learn about the types of scams and inform them of scams.
- Report fraud and earn TSIT Token as reporting funds.
- Verify scams and earn guarantee funds and mining rewards.
- Victims can get compensation for their losses.
- Check the validity of the project before investing.
- Find a full website with certified scams that will help prevent scams.
- Victims can get professional advice and guidance to find the missing bag.
- Victims can hire lawyers to take legal action against fraudsters.
- Victims may also direct contact with a specific cyber cell department any country.
- The Tesla Inu Foundation will support victims to take their case further.
- which is important for strictly following the relevant departments.

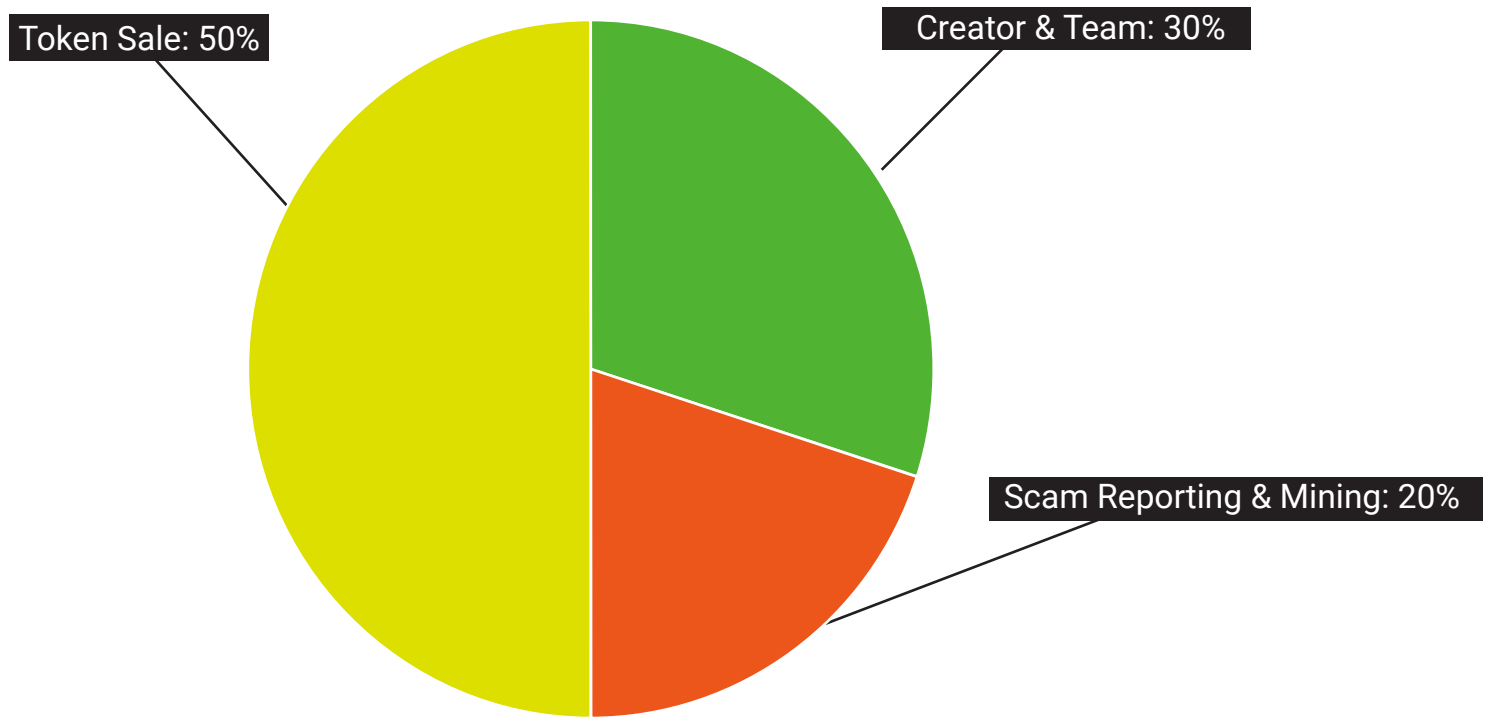

TOKEN ECONOMICS DETAILS

Token Distribution:

Creator & Team: 30%

Scam Reporting & Mining: 20%

Token Sale: 50%

FUND DISTRIBUTION DETAILS

The fund, which will be raised by token sale, will be distributed & used among the below given sections.

- Liquidity Pool: 61%
- Project Development: 20%
- Listing and MM: 10%
- Operational Exp: 6.5%
- Charity: 2.5%

UTILITY OF TESLA INU TOKEN.

Utility of Tesla Inu Token is the usability of Token on different platforms for different purposes.

- 
- As reward to Scam Reporters
 - As reward to Scam Miners
 - To hire Legal Advisors
 - To buy database of scams, lawyers & Cyber Crime Departments
 - To donate to the Victims
 - To donate to Tesla Inu Foundation
 - To get a credit report certificate for companies, projects or individuals.

STRATEGIES

So as to promote our project we have built up some strategies

MARKETING & PROMOTION MODEL :

- Website Marketing
- The crypto market is developed to an extent that we have several sites where we can hold promotions for our project with taglines to grab the attention of almost every user.
- SEO & SMO (FB, Twitter, Instagram, LinkedIn, Snapchat & YouTube)
There is no other platform stronger than social media
- platforms to boost the reach of our motive.
- Airdrop & bounty program
- Press Release
- Articles & Blogs
- Networking by users and miners
Those who already have a taste of our service work as the best promotion.

REVENUE MODEL:

Listing and Market marking

We have scheduled the listing of TSIT on at least 3 different exchanges in Aug 2024. So, we will be having lot of new traders from these exchanges

Investments & Reserves.

As we have already mentioned in fund distribution that we are going to utilize 30% of the total raised fund from the token sale for Investments and reserves. That will be back funds for all future uncertainty of price dumping.

Scam Mining Staking Program

Scam miners will have to stake/hold the TSIT to mine scam and to earn TSIT fees and rewards. So this staking will bring stability in the price movement of TSIT.

The miner gets to hold a particular value of token and they increase either with the money or the number of cases reported and verified.

Selling of Legal Advisors' services

So, our portal will be having the services of legal advisor for victims, so they can buy any services on the portal using TSIT. That will generate stable revenue for the Tesla Inu Foundation.

Selling of Database of Scams, Legal Advisors, Cyber Crime Departments, etc

The above mentioned services will also be bought using TSIT only.

Credit Rating Agency Service Fees.

Tesla Inu Foundation eyes to launch its own credit rating agency by June 2025. Which will be first of its kind service in crypto space. TSIT Will be the mode of payment to get the credit certificate by company, users or any individuals.

ANTI MONEY LAUNDERING POLICY

1. TSIT is providing services unique to prevent the use of its operations for money laundering or any activity which facilitates money laundering, or the funding of criminal activities.

2. On a global level, in order to prevent and combat money laundering and terrorism financing, there has been an introduction of the number of laws concerning the customer identification and verification procedures including but not limited to the EU.

Directive, which brings the virtual currencies under the scope of the Anti-Money Laundering Directive.

3. In the United States regulation of the AML is carried out by a special government body under the US Treasury. In particular, Fin CEN regulates, so-called, "money services business" (MSB). In 2013 FinCEN published the clarification on the regulation of persons administering, exchanging or using virtual currencies bringing the businesses dealing with virtual currencies under the scope of AML/KYC in terms of spotting suspicious financial behavior.

4. In order to ensure that our operations are compliant with the AML/KYC rules and procedures, we are implementing the AML/KYC policies detailed below.

As part of our AML (Anti-Money Laundering) Policy in order to combat money laundering and illegal financing activities the Company follows the customer risk assessment principles that include but are not limited to the following: –

– (a) raise awareness on money laundering issues; – (a) appoint a designated CCO. The CCO is to report any suspicious transactions to the appropriate Financial Authority; assist law agencies and authorities to trace, seize, and confiscate the proceed of criminal activities; –

– freeze any funds deemed suspicious and investigate the source of finance;

introduce a Know-Your-Customer Policy (KYC). CCO has a right to freeze any funds already transferred should the suspicion as to the sources of those funds arise after they have been deposited and investigate the customer's transaction in retrospect.

(b) exercise reasonable measures to obtain information about the true identity of the persons on whose behalf a transaction is made; record keeping procedures maintain, for a specific time period, all necessary records on transactions, both domestic and international;

(c) Pay special attention to all complex, unusually large transactions; adopt economic, administrative, self-regulatory and other measures which can be taken to create an effective shield against money laundering; train staff accordingly; employ proper care in the hiring of new staff.

5. Company adopts the KYC (Know-Your-Customer) Policy and reserves the right to undertake KYC in order to verify the identity of its customers at any point.

6. As part of the customer risk assessment, the following will act as Money Laundering Warning Signs based on guidance provided by Financial Action Task Force (FATF) international body set up to combat money laundering: – customer says that the funds are coming from one source but then at the last minute the source changes; evasiveness or reluctance to provide information; incomplete or inconsistent information; unusual money transfer or transactions (e.g., when customer deposits unusual amounts (e.g., \$9,990) so as not to come under the threshold when KYC applies); complex group -structures without obvious explanation that may be designed to disguise the true source and ownership of money; when money is coming from the list of 'high-risk and non-co-operative jurisdictions' according to FATF; negative public information available about the client or company.

7. The Personal Information requested as part of the KYC procedure will be collected, processed, used and stored in accordance with the General Data Protection Regulation (GDPR), rules and principles of which have been reflected in the TSIS Privacy Policy and implemented on the legal, technical and organizational level.

8. The above principles and warning signs are aimed at determining the customer's risk in terms of propensity to commit money laundering, terrorist financing or identity theft.

9. Every Employee is required to act in furtherance of this policy statement to protect the Company from exploitation by money launderers or terrorists.

10. As part of the exercise of this right, the Company may require the following information to be sent: copy of passport or national ID; recent utility bill; recent bank account statement 'Recent' means no longer than 3 months from the date of issue.

11. Please note that the list above is not exhaustive and we reserve the right to require additional information at any time to verify the client's identification and to fully satisfy the latest Anti Money Laundering rules.

12. If any of the above documents are requested, prior to sending them to us we may require them to be certified as a true copy of the original by a Solicitor or a Lawyer who must use their company stamp. We require the documents to be sent to us in high quality color format. We reserve the right to reject any documents, which do not comply with the above or if we have doubts as to their veracity.

13. If any doubt arises, we reserve the right to check the information provided, as part of the KYC Policy, using no documentary methods including but not limited to contacting the customer directly.

PRIVACY POLICIES

WELCOME TO THE TESLA INU'S PRIVACY POLICIES.

Effective date: - 01/09/2023

You trust us with the information when you use our services. This privacy policy will make clear to your understanding what type of database we create and store for our users. Privacy Policies are always important, take your time to understand every piece of information we made online here and trust us with the process.

What information does Tesla collect about you?

In order to know our customers our website asks them to enter their name/company's name/representative's name including your IP (Internet Protocol) address, domain name, browser type, operating system, and information such as the web site that referred you to us, the files you download, the pages you visit, and the dates/times of those visits.

Collection of person-to-person personal data.

If you register for a new scam or scam that has been done in the past, log on to Tesla INU's site, request information, apply for investigation, join a miner with the provided lawyer, you will be asked to provide personal information such as your name, postal address and email address.

This information is collected only with your knowledge and permission and is kept in various TESLA's databases and mailing lists. If you are purchasing our services using the TSITs, you may be asked to provide your details. These details are transferred to a secure, online payment service, hosted securely by TESLA. Any sort of payment information is not retained by our website as the medium of service is TSIT.

Our sites with specific requirements to collect personal information may publish a privacy policy specific for that site. In these cases, the site-specific policies will be complementary to this general privacy policy but will give additional details for that particular site.

For certain TESLA sites, registering or supplying personal information sets a cookie*. By setting this cookie, our site will remember your details the next time you visit, so you don't have to re-enter the information. This helps us to provide you with a better service.

HOW DO WE USE THE COLLECTED DATABASE?

The information and data collected during previous reporting or surfing is saved and used by our team to analyse the most repeating patterns of scams and from where they are being committed to ridicule the happening of the same event from a same domain or id.

Personally identified info

Tesla may use the personal information you entered to:

Contact you – either in response to a query or suggestion, documents, any other lead. to you;

Manage and process your scam reporting;

Confirm your registration and requirements on the site;

Explain to you how we use TSIT as a replacement for cash/money here. “Remember” your online profile and preferences;

Help you quickly find information that is relevant to you based on your report, and help us create site content most relevant to you.

Security

We do not share any personally identifiable information volunteered on the site to any third party. Any information provided to us by users of the site is held with the utmost care and security, and will not be used in ways other than as set forth in this privacy policy, or in any site-specific policies, or in ways to which you have explicitly consented. Our company employs a range of technologies and security measures to protect the information maintained on our systems from loss, misuse, unauthorized access or disclosure, alteration, or destruction. All our employees who have access to, and are associated with the processing of

personal data, are obliged to respect the confidentiality of official scam matters, including personal data and the amount lost to scammers.

The website contains links to our dashboard. We are not responsible for the privacy practices done outside the bond of Tesla and our client.

Notification of changes

Changes to this privacy policy will be posted on the home page at our website.

- Scam Mining Reward is given to the Scam Miner who verifies maximum no. of scams but in case two scam miners verifies same no of scams in a given time slot (Scam Block) then 10,000,000 TSIT will be distributed equally to both the scam miners. i.e., 5,000,000 TSIT each

19) How can I earn a Scam Mining Reward?

- You can earn a scam mining reward if you verify the highest number of scams in a given time slot (scam block). But to receive good no of scam reports to verify you must hold good no of TSIT in Scam Mining Wallet on www.teslainu.com.

20) Is there any minimum TSIT holding required to become a Scam Miner?

- No. But You must hold 100,000,000 TSIT to qualify for earning Scam Mining Rewards. If you hold less than 100,000,000 TSIT then you can verify and earn Verification Fees only.

21) How many scam reports can I get to verify in 24 hours?

- It depends on your TSIT wallet balance of your scam mining wallet. If you hold more, you get more reports. Daily scam reports will be distributed in the ratio of each scam miners mining wallet balance.

For example, if 4 scam miners A, B, C & D hold TSIT their scam mining wallets as given below

A holds: 500,000,000 TSIT

B holds: 300,000,000 TSIT

C holds: 1,000,000,000 TSIT

D holds: 200,000,000 TSIT

Then their holding ratio A: B: C: D = 25%: 15%: 50%: 10% So out of 100 reports A, B, C & D will receive 25, 15, 50 & 10 scam reports to verify respectively.

22) Can any scam miner who holds 100,000,000 TSIT but less than other scam miners earn a scam mining reward?

- Yes, if a scam miner who is fast to research & verify all the given details of a scam report fast and keep on doing consistently in 24 hours. The he/she can verify highest no of scams & can earn scam mining reward of 100,000,000 TSIT.

23) Do I need any mining equipment or physical set up to become a Scam Miner?

- No, you don't need any kind of mining equipment or physical setup, rather you need to hold some TSIT in the mining wallet of www.teslainu.com.

24) Is there any validity of each scam report to verify?

- Yes, you will get 24 hours to verify a scam report and if you don't verify the scam in 24 hours then that scam will be disabled automatically.

25) Does each scam report require 100 verifications?

- No. Scam confirmation will be done in 24 hours whether 100 miners verify or less. The maximum verification of one scam is 100. There is no limit on minimum verifications to confirm the scam.

26) Who is eligible to get the compensation of loss due to scams?

- The one who is scammed, needs to submit all the details with proof of his payments. Then if this scam was verified & confirmed on our platform, then he/she will be eligible for the compensation of his/her losses.

27) How much compensation will be given?

- The compensation amount depends on the proof & scam type.

28) What is the form of compensation amount?

- Compensation amount will be given in the form of TSIT only.

29) How will the compensation amount be given after eligibility?

- Compensation amount will be given in the victim's TSIT wallet on www.teslainu.com in 10 parts. 10% of the approved amount will be given every month for 10 months.
